

Environmental Policy

South Pacific Scaffolding is committed to operating in an emissions and energy-efficient environment and considers the management of its (GHG) emissions to be a principal component of its environmental and sustainability objectives.

It is our aim to exploit all opportunities for energy savings throughout the business, in order to establish ourselves as an environmentally responsible organisation as well as a contributor to national carbon reduction targets.

Our Key Principles:

- **Energy Efficiency:** We are committed to implementing energy efficient practices in scaffolding use and transportation logistics to reduce carbon emissions associated with products and delivery.
- **Sustainable Materials:** Utilise eco-friendly materials for scaffolding and Shrink wrap for our projects. The use of recyclable material over materials that break down such as recyclable shrink wrap and the use of high-quality equipment which has a longer useful life, for example the use of Layher equipment.
- **Renewable energy:** Transition to renewable energy sources such as solar and wind power for office and yard operation to minimise reliance on fossil fuels. Taking science-based action for a better environment. Set up from 2020-2030 (10 year plan) by 2030 company will use EV to replace all 90% of fossil fuels.
- **Education and Engagement:** We commit to align ourselves with environmentally and socially responsible suppliers and client's.

We are committed to:

- Protect the environment;
- Prevent pollution;
- Conform with ISO 14001:2015 and comply with all relevant compliance, legal, regulatory and statutory requirements; and
- Work towards continuous improvement.

Environmental Policy

The objectives framework we will use to pursue this commitment is:

- Making every reasonable effort to protect the environment from adverse effects, and to minimise any impact that may arise from our operations;
- To encourage staff to respect the environment by utilising appropriate operating procedures, training, providing information concerning the storage, handling, distribution, use and disposal of hazardous substances;
- Carry out regular reviews of our processes to verify compliance with this policy; and
- Provide information about any potential environmental hazards to relevant clients, authorities, employees, and other affected organisations.

At South Pacific Scaffolding, environmental responsibility is integral to our business philosophy. By committing to climate positivity and empowering others to join us in this journey, we aim to lead by example and contribute to a sustainable future for generations to come.
